Arlington National Cemetery (ANC) proposes a project to install three 19 feet by 6 feet metal and glass Solar Panel Shelters at three locations in the cemetery. We plan one shelter each for Custis Walk, one for Grant Drive, and one near the intersection of Memorial Avenue and Wilson Drives and Curtis Walk. The structures will meet the need for outdoor shelter during inclement weather and provide charging ports for visitors' cell phone and camera batteries.

ANC invites review and comment from the public on this project. We do this in accordance with Section 106 of the National Historic Preservation Act and The Programmatic Agreement among Arlington National Cemetery, The Virginia State Historic Preservation Officer, and the Advisory Council on Historic Preservation for the Operation, Maintenance, and Repair Activities at Arlington National Cemetery.

The document "Arlington National Cemetery, Solar Panel Shelters, Arlington, Virginia, Project Description, Areas of Potential Effects, and Assessment of Effects" accompanies this notice. It shows the areas affected by the project, contains annotated photographs of those areas, illustrates the proposed work, and lists the historic properties contributing to National Register of Historic Places Historic Districts which are in the area of potential effects.

As researched, evaluated, and documented, there are no significant archaeological resources in the area of potential effects.

ANC's Cultural Resource Manager assessed the effects of the proposed undertaking using the criteria of adverse effects (36 C.F.R. 800.5(a)(1)) and determined the project will have No Adverse Effect on the characteristics which qualify Arlington National Cemetery and Robert E. Lee Memorial (Arlington House), for listing in the National Register of Historic Place. .
